

**IF YOU BELIEVE
SPACE SHOULD BE MORE THAN A SPECTATOR SPORT,
JOIN THE MOON SOCIETY AND
HELP PRIVATE ENTERPRISE PUT MANKIND
BACK ON THE MOON!**

If you've ever dreamed of flying in space yourself, or just want to see the human race "out there," you owe it to yourself to find out about the Artemis Project.

The Artemis Project is a privately financed commercial venture to establish a permanent, manned lunar base and to exploit the resources of the moon for future development of space travel. The Artemis Project is unique among proposals for developing a moon base because it:

- is a 100% privately financed space development program,
- plans to establish a manned lunar base early in the 21st century,
- is developing a program that will lead directly to permanent human settlement and development of the moon,
- will pay for itself each step along the way,
- leads directly to commercial flight to the moon and beyond, and perhaps most importantly,
- invites YOU to take control of your future in space by participating directly in the development of space flight!

The Moon Society was formed in 2000 to provide everyone with an opportunity to participate in developing lunar flight that will be available to private citizens! No matter what your interest or talents, there is a role for you in the Moon Society!

Find out how you'll be able to travel to the moon in the near future — be sure to visit the Moon Society web site at: www.moonsociety.org.

Yes! I want to help mankind return to the moon — permanently!

Enclosed is \$35 for one year's membership in the Moon Society.
